It will help you avoid relying on your own local language quirks when writing and create a more culturally neutral work.This article is accurate and true to the best of the author'sÁÁs knowledge. :) I think for communications that will stay within the area (such as news shows), it's probably not that much of an issue. It makes me feel tricked. I have to admit that sometimes I had to look up word usages to understand what the author was trying to convey. That'sÁÁÁs not very nice but I don'tÁÁÁt want to always work hard to understand what the heck people are trying to say.Louise Powles from Norfolk, England on January 30, 2018:That's interesting to know. know.
